

# gasclip technologies

## Portable gas detectors you can count on

### Multi Gas Clip Infrared

The only multi gas detector that can run continuously for **2 months without a recharge** due to advanced infrared technology. Infrared sensor is **immune to poisoning** and detects toxic gas even in inert environments. Features: **one year calibration cycle**, easy one button operation & fails to safe to assure protection. Compatible with the simple to operate MGC Dock or MGC Wall Mount Dock.

**Tests for combustible gases (LEL), H<sub>2</sub>S, CO and O<sub>2</sub>**

*Also available in pellistor & 2 gas versions, specs vary*

### Multi Gas Clip Pump Infrared

Compact multi gas detector with internal sampling pump runs for up to **5 days straight on one charge** due to low-power photometric technology. Perfect for confined space entry monitoring. Features: **calibration once yearly**, infrared sensor that is immune to poisoning & doesn't require oxygen to detect gas, **75 ft. draw** capability through secure stainless steel gas inlet, **ergonomic design** for optimum comfort, easy one button operation & fails to safe assuring protection. Compatible with MGC Pump Dock or MGC Pump Wall Mount Dock.

**Tests for combustible gases (LEL), H<sub>2</sub>S, CO and O<sub>2</sub>**

*Also available in pellistor & 2 gas versions, specs vary*

### Single Gas Clip

Eliminate downtime with this ultra-reliable portable gas detector. It meets all needs with **adjustable alarm set points & real-time gas reading** capability. Each detector is quality tested to ensure day after day dependable performance. Compatible with the industry's easiest to use docking stations the SGC Dock or SGC Wall Mount Dock.

**Tests for H<sub>2</sub>S, CO or O<sub>2</sub>**

### Single Gas Clip Plus

When this durable detector is not in use, the **life extending hibernate mode** allows the detector's life clock to be stopped temporarily. There is no minimum hibernation time required in order to extend the detector's life, so **every minute hibernated is a minute saved**. Compatible with SGC Dock or SGC Wall Mount Dock.

**Tests for H<sub>2</sub>S or CO**

## Compatible Docking Stations

Save time & gas - **bump test 4 detectors at once in less than a minute.**

Snap in and push a button, it's that easy!

Simple to use docking stations each feature a **built-in gas cylinder compartment with regulator & pressure gauge** for quick & efficient bump testing & calibrating. **Removable 4 GB USB** logs bump tests, calibrations & events for analysis anytime & can be used to easily perform firmware updates & detector feature customization.

**Rechargeable lithium battery** allows for complete portability, charging cord included. Docks are housed in rugged Pelican cases that go where you need them to go. Wall Mount Docks can be set on a surface or mounted in a convenient location.

**MGC Dock**

**Docks and Wall Mount Docks are available for Multi Gas Clip, Multi Gas Clip Pump and Single Gas Clip/Single Gas Clip Plus.**

**SGC Wall Mount Dock**
